

Photon Trade Plan (2024)

[8. TRADE PLAN](#)

TIMEFRAMES

HTF - 4H -> Narrative - PT run or CT pullback phase - signals when MTF may change trend.

MTF - M15 (1H) -> Immediate bias and POIs - fulfils HTF objective.

LTF - M5 (M15) -> Execution for MTF POIs / ideas.

MTF POIs with LTF execution.

MTF NARRATIVE & POI SELECTION

What's the current objective?

What has been mitigated?

Use MTF Phases cheatsheet.

MTF PHASES

No Phase A2 / D / Ranges (*this is just an example - change as you see fit*)

EXECUTION

Mitigation -> HP MTF POI

Liquidation -> Identify / wait for strong liquidation (LC-2A fake break / LC-1 LID sweep)

Validation -> PBL / Early Entry (discretion in HP scenarios)

Place stop order entry in front of liquidation candle (LC) when closed + add buffers

Trail stop order in front of each new candle until tagged or MTF POI fails.

Entry buffer -> spread

SL buffer -> EU 2 pips (discretion if volatility changes / suitable R:R)

MANAGEMENT

Fixed 'x'R (discretion for bigger targets in HP scenarios)

RISK MANAGEMENT

Max 3 losses per day

Risk 'x'% per trade

2 pip SL minimum

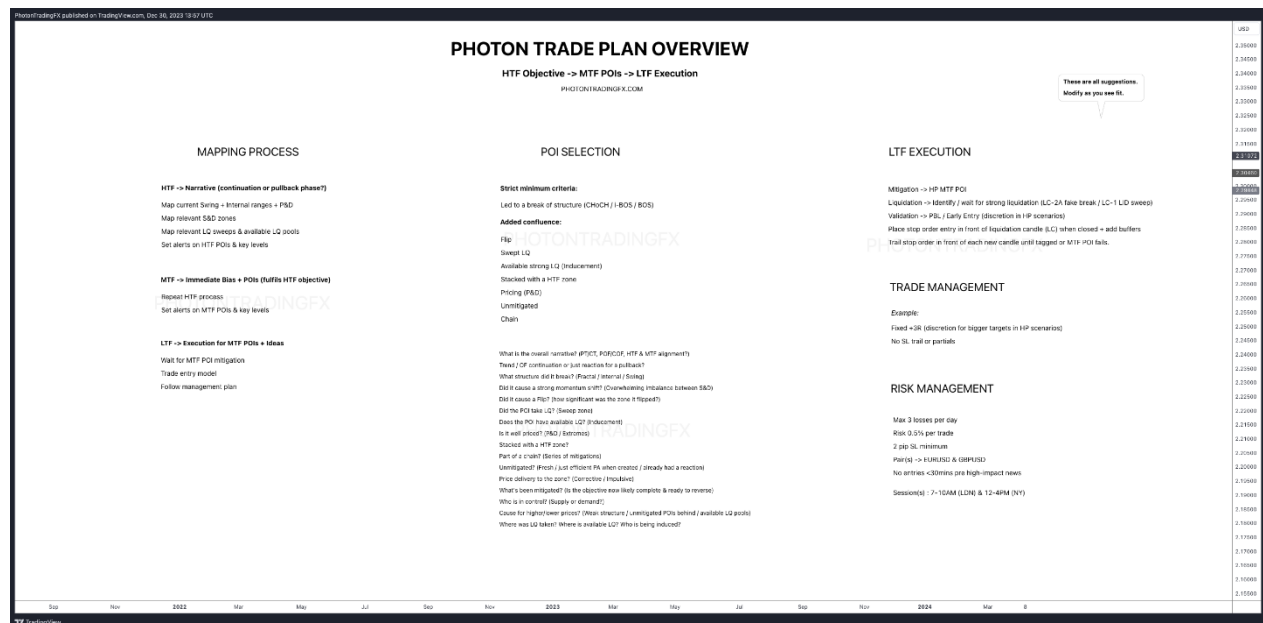

Pair(s) -> EURUSD & GBPUSD

No entries <30mins pre-restricted news events (NFP / US CPI / rate announcements)

Session(s) -> 7-10AM (LDN) & 12-4PM (NY)

PHOTON TRADE PLAN OVERVIEW

LC-1

<https://s3.tradingview.com/snapshots/u/UxpAPQsG.png>

LC-1 REQUIREMENTS

<https://s3.tradingview.com/snapshots/k/KhL7zaxA.png>

Think of iC-1 as a 'hoguer' entry model that is ideally used in specific circumstances:

- High probability MTF PDI
(i.e. unmitigated extreme / price flip / UD / S&D chain / well-priced in a tight range
high probability that the PDI will hold if the trend is to continue)

Causes for higher prices with unbought supply behind
No strong MTF liquidation

How to define if a range is too large?

- > Phase A (Pro MTF Swing - Pro NTF Internal)
- > Tight MTF internal range
- > Well-priced premium MTF Swings retail

This is a hard MTF Phase to master, so keep it out of your plan until you are consistently profitable first.

- **Bullish MTF 1-30s**
- **Very likely MTF** Swing pullback is starting
- **ready to target premium MTF supply**

At best you can play a quick MTF internal pullback here. Not the time to use an aggressive entry model like LC-

Internal unmitigated extreme supply
No cause for lower prices

↓
