Quick Reference

When following GTRADES-AXIS™ analysis, you will frequently see examples such as:

- HTF Bullish → Wait for LTF CHoCH inside Demand.
 - Liquidity sweep above BSLQ before bearish Entry Model.
 - Bullish BOS confirms continuation toward PDH.
 - Wait for HP setup at HTF POL.
 - Protect trade by moving SL to BE after partial TP.
 - Always align Supply & Demand with Market Structure and Liquidity.
-

Key Takeaway

Understanding these system terminologies is essential for interpreting GTRADES-AXIS™ chart analysis and executing trades consistently.

As you progress through the academy, these abbreviations will become second nature and enable you to read market commentary quickly and efficiently.

GTRADES-AXIS™

Trade with Structure. Execute with Precision.
